Qsonix Q105/Q110 Music Management Systems

# QSONIX RELEASES MAJOR V2.6 SOFTWARE AND PERFORMANCE AUDIO UPGRADE

ULTIMATE AUDIOPHILE MUSIC SERVER NOW  
SUPPORTS USB DAC'S AND HI-RESOLUTION MEDIA

**Westlake Village, CA (February 18, 2010)** – Today, Qsonix began shipping its highly anticipated version 2.6 software update that is available to all existing users and product models. This upgrade includes numerous feature enhancements and user interface improvements throughout the system, including Track/Song Composer browsing and search, GUI and cosmetic enhancements including new buttons, menus and fonts, new album views, including composer and track encoding details, web interface improvements and more.

Version 2.6 adds support for the optional “Performance Audio Pack” upgrade that delivers third-party external USB DAC (Digital to Analog Converters) capabilities, .WAV Uncompressed CD ripping and import and playback of high-resolution 24-bit audio. The Performance Audio Pack upgrade is available to all new and existing Qsonix customers and is priced at \$600 USD.

These enhancements open the gate for discerning audio listeners to take advantage of the increasing number of mid and high performance USB DAC’s appearing in the market as well as the benefit to enjoy the ultimate music experience with high-resolution audio from online music sources such as AixRecords.com, Itrax.com, HDtracks.com, Linnrecords.com and others.

Qsonix music management systems are the perfect choice for music collector’s big or small and discerning audio buffs that have been looking for the best way to make the transition from single disc CD players/transports, CD changers and turntables to the ultra-modern era of digital Hard Drive accuracy and music enjoyment.

## NEWS RELEASE

Imagine having your entire music collection accessible at the touch of your fingertip allowing you to find any song, album or to create your favorite playlist(s) by listening genre or favorite playlist name. Qsonix delivers unprecedented convenience and control with uncompromising sonic audio performance, now including support for hi-res 24-bit audio playback at up to 192kHz.
