

RELEASE NOTES

Platform:	Qsonix
Release Version:	2.4.8c
Release Build:	3.2.112.137
Release Date:	12/17/2008
Products Affected:	Q100, Q110, QJB110

These release notes are provided for informational purposes only and are intended to describe changes, improvements and bug fixes that have been made in the indicated software release published by Qsonix. Where applicable, new features will be described in brief, additional documentation or details may be available on the Qsonix website.

- 1) Corrected an issue in the iPhone / iPod Touch interface that could cause the track order for an album to be incorrect.
- 2) Improved and corrected certain CD Loading issues, including extra delay between tracks when loading CDs on large libraries.
- 3) Removed Track Artists from search results in the iPhone interface (was generating empty artist results).
- 4) Improved handling of automated system backup for larger libraries.
- 5) Disabled the ability to control volume through IR, Web and iPhone interfaces when local volume control is disabled for a playback zone.
- 6) Removed miscellaneous logging items that were resulting in significant increases in log file sizes.
- 7) Began logging version and build numbers on startup.
- 8) Removed the ability to save a new playlist with a name that is empty or consists only of space(s).
- 9) Fixed a problem with AlbumViewers displaying two tracks as currently playing (refresh issue).
- 10) Fixed a problem where previewing a track at the end of a currently playing track would result in stopped playback.
- 11) Implemented checking for IP address changes and automatically updating QsonixCentral when a change occurs.
- 12) Fixed a problem of ZoneTabs not displaying correctly when switching from Analog to Digital mode and back.
