These release notes are provided for informational purposes only and are intended to describe changes, improvements and bug fixes that have been made in the indicated software release published by Qsonix. Where applicable, new features will be described in brief, additional documentation or details may be available on the Qsonix website.

1. Added support for loading cover art from a USB thumb drive. When inserted, USB thumb drives will appear in the list. Currently, on the root directory will be searched so cover jpeg files must be placed there to be found by the Edit Cover Art feature.
2. Deleting a track from the now playing queue that occurs before the currently playing track when the repeat enabled would previously cause a playback problem that could potentially include two tracks playing simultaneously.
