Products Affected:	Q100, Q110, QJB110, Q105, QJB105, Q205, Q210

These release notes are provided for informational purposes only and are intended to describe changes, improvements and bug fixes that have been made in the indicated software release published by Qsonix. Where applicable, new features will be described in brief, additional documentation or details may be available on the Qsonix website.

## GENERAL /New Features

Version 3.5 is considered a point release that includes support required for the Qsonix iPad Remote Pro app version 1.1 update. Version 3.5 also includes other bug fixes and system optimizations. *This release can be identified from the Tools/Information tab and will report v3.5, build 3.5.11.4 in the version information.*

### New in version 3.5

This update is focused on implementation of our new network communications features to support new functions in our Remote Pro for iPad app.

*The version 1.11 Qsonix Remote Pro iPad update was submitted to Apple on April 20th, 2011 and should be available for download soon via app store.*

### Qsonix Remote Pro for iPad (update v1.11)

**Note: The Remote Pro app requires a Wi-Fi network that supports UDP broadcast protocol** and Qsonix Music Management system running version 3.5 or greater firmware

- Added intelligent search function for keyword search by Song, Artist, Album, Genre
- Added New Sort modes to sort album view by Artist, Album and Year
- Corrected issues relating to updating Remote Pro album covers with covers edited on server
- Corrected some network discovery issues that allow Qsonix device discovery to operate properly
- Other minor bug fixes and cosmetic enhancements

### Miscellaneous changes & bug fixes:

- Corrected issue relating to saved playlists track order getting corrupted in isolated circumstances.
- Added intelligent search support to our IP service to support advanced high-speed, auto-complete search capability for client devices (Remote Pro for iPad).
