Qsonix Q110 Touch Screen Controller

QSONIX DEMOS NEW VERSION 2.2 SOFTWARE AT EHX'S TECH ZONE

TWO VARIATIONS: NOSTALGIC JUKEBOX OR SLEEK TABLETOP

Westlake Village, CA (November 2, 2007) – Qsonix, leader and developer of the industry's simplest and fastest drag-and-drop user interface in digital music management systems, will demonstrate their new Series 110 touch screen based systems and Version 2.2 Software at Media Center Tech Zone (booth #1026) during Electronic House EHX Fall 2007 Expo in Long Beach, CA.

Along with Qsonix, Media Center Tech Zone at EHX will feature leading suppliers of media center PCs, related servers, media center-enabled consumer electronics, extenders, as well as peripheral products.

"EHX's Tech Zone is the perfect venue to showcase our new music management systems," said **Mike Weaver**, president and co-founder of Qsonix. "Electronic systems contractors will experience a touch screen enabled drag-and-drop demonstration of the world's first multi-room capable jukebox music management system. We can't wait to show it off."

Users will enjoy an uncluttered non-technical graphical user interface (GUI), which provides built-in help and access to all system features and functions. The dynamic touch screen controller and latest software package (Version 2.2) is available in two unique variations: the Q110 tabletop system which can easily mount into a media storage rack or center and the new QJB110, a salute to nostalgia in an authentic handcrafted solid walnut and die cast metal exterior juke box.

No ordinary jukebox, the gorgeous QJB110 operates as a stand-alone jukebox music system with built-in 900W amp, speakers and subwoofer and as a multi-zone system that can be shared throughout the home.

qsonix NEWS RELEASE

The new Version 2.2 software enhancement adds MusicGiants™ robust, high-quality HD Download Store with one-touch immediate access. In concert with Qsonix's award winning Album Browser™ drag-and-drop interface, customers can quickly browse, sample, purchase and play high quality numbers from the MusicGiants' premium library of more than 500,000 audio tracks.

Upgraded Tapestry features expand personalization when building unique play lists. Powered by the AMG™ Tapestry technology, Qsonix allows quick and easy creation of multiple play lists based on the user's style or theme. These attributes build perfect play lists for every party, festivity and mood.

Qsonix uses the Windows Media Audio (WMA) lossless compression format to deliver a bit-for-bit match of the original CD. In an instant both models can automatically retrieve album art and descriptive data about the user's CDs from the Internet. Qsonix newest features include tech savvy remote control access as the system can be easily managed and controlled via any desktop or wireless computer throughout the home. The series also includes iPod transfer, CD burning and automatic Internet updates

The Q110 library will manage up to 3,000 CDs in high-quality lossless mode and up to 18,000 CDs in compressed mode. The QJB110 Jukebox stores up to 9,000 CDs.

The new 110 Series can be quickly and easily integrated with existing home entertainment control systems such as AMX, Crestron and others. Both models come equipped with four discrete analog audio outputs, expanding multi-room capabilities to four zones that can be independently controlled with separate play-lists, playback and volume control. Customers can simultaneously manage and enjoy unique music in multiple locations throughout their house.

About Qsonix

Located in Westlake Village, California, Qsonix is a market innovator and leader in providing user-friendly digital media technologies. With its world-class user interface, Qsonix offers the most reliable and truly friendly digital music management systems available.
