**FOR IMMEDIATE RELEASE**

### **QSONIX ANNOUNCES SWEEPSTAKES WINNER**

**AGOURA HILLS, Calif. – January 11, 2006** – Qsonix, a leading innovator providing user-friendly digital media technologies for both residential and commercial audio applications, announced the grand prize winner of the AudioVideoRevolution.com monthly sweepstakes as Matthew Summers of Indianapolis, Indiana. Summers won the **Q100 Digital Music Entertainment (DME) System** valued at \$5,495.00.

A digital music management system that incorporates the industry's first "drag and drop" graphical user interface technology, the Q100 is capable of storing up to 7,500 CDs. Using the industry's best-in-class touch screen display panel, users simply use their fingers to drag and drop individual tracks or complete albums to create, manage and play their music playlists, eliminating the use of frustrating menus or complicated steps found on other systems. The Q100 DME, which comes with either 160GBs or 400GBs of hard disk storage and a 15-inch TFT LCD touch screen controller, can be integrated with leading home automation control systems and is designed for both residential and commercial applications.

"I am thrilled to be the grand prize winner of the Qsonix's sweepstakes, and have already found the system a joy to use and operate. The system's 'drag and drop' touch

screen interface is the easiest way to manage my music that I have ever used. Even my kids can operate it," said Matthew Summers, winner and owner of Alpha-Mortgage Company in Indianapolis, Indiana.

#### About Qsonix

Located in Agoura Hills, California, Qsonix is a market innovator and leader in user-friendly digital media technologies. With its world-class user interface, Qsonix offers the most reliable and easy to use digital music management systems available, addressing a wide variety of lifestyles, tastes and environments. Consumers and businesses alike can quickly and easily store, organize and playback music without the hassle.

Qsonix's entry into the home entertainment market is focused on the music enthusiasts typically served by the custom installer channel for discrete audio and home theaters, as well as more complex whole house distributed audio environments.

Qsonix also markets to the commercial market, which consists of public venues, such as bars, pubs, clubs, restaurants, eateries, coffee houses, hotels, department stores, retail outlets and professional offices, where background music playback provides an important role in the mood, entertainment or theme of the establishment.
