

Qsonix Integrators can now utilize the RapidRun™ product line when installing Qsonix Q110 music management systems. Our custom manufactured RapidRun™ flying leads used in combination with RapidRun™ PC Runner™ cables allow a seamless single cable run between our server and touchscreen controllers at lengths up to 100’.

Complete cable sets, including Runner and Flying leads are now available directly from Qsonix in lengths of 15ft, 25ft, 50ft, 75ft and 100ft, or purchase our custom flying leads only if you already use RapidRun™

RapidRun™ is designed to be the standard for in-wall Audio/Video installations. The RapidRun™ system allows for a customized installation to create an ideal Audio/Video solution. Break-Away Flying Leads and Wall Plates ensure flexible, efficient, high quality connections for your Qsonix installations.

Features:

- Custom Qsonix flying leads are available with or without Runner™ cable (must be dealer supplied)
- Flying lead kits are properly gendered and ready to use on both server and controller.
- Leads address both the VGA & RS232 requirements of Qsonix systems.
- Connectors include a protective pulling cap capable of 30 pounds of pulling tension
- Three- 28 AWG coaxial cables with braided copper shielding, three- 24 AWG twisted pair plus a single 24 AWG pair
- Supports Qsonix TS15 and TS17 controllers
- CL-2 rated for in-wall installations
- Compatible with Qsonix ACC-CAT5 extension accessory.
